TO.....
.....THE FUTURE
* * *

As the Class of '58 completes another step up the ladder of education we offer to them our sincere congratulations and the hope that each member of the class considers his or her high school diploma not as a goal achieved, but rather as another step toward the final goal.

Never in history has the need for higher education and technological specialization been so important to the individual or to the country.

The Class of '58 stands on the threshold of a new era in the history of man. Where they go from here will determine the part they will play in that era.
